

Manual & Warranty

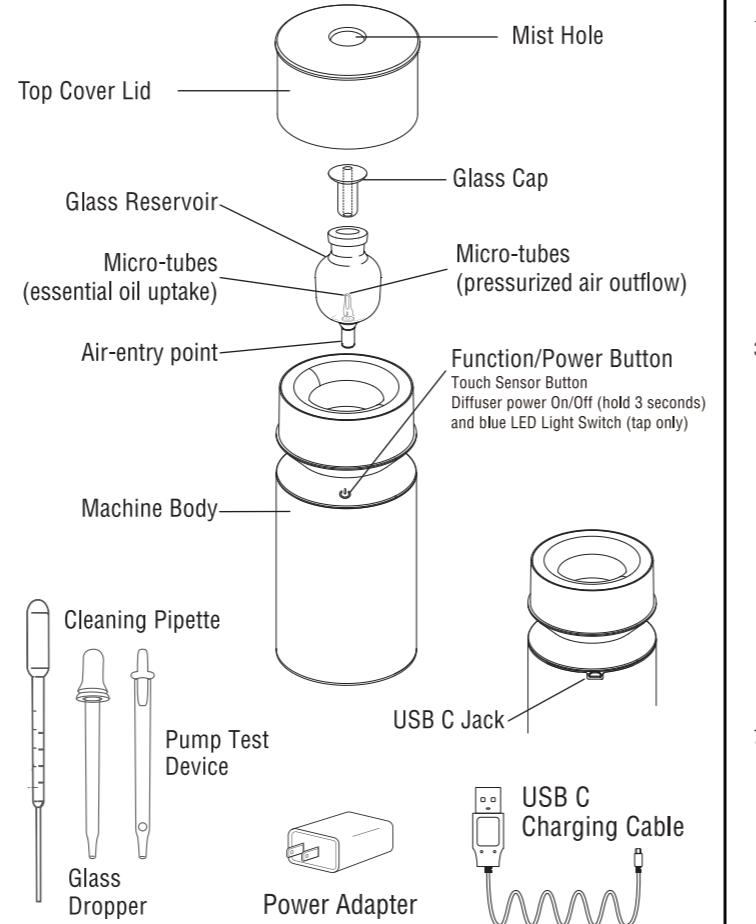

Mobile - Smart Nebulizing Diffuser

Wireless • Rechargeable
Bluetooth • App-Controlled

Organic Aromas

Components

Operating Method

1. When the power is off, open the top cover lid, remove the glass cap and take the glass reservoir out of the machine.
2. While the glass reservoir is OUTSIDE of the machine add 20-25 drops pure essential oil to the reservoir.
3. Replace the glass cap, glass reservoir, close the top cover lid.
4. On your smartphone or tablet, open the Google Play Store or Apple AppStore.
5. Search for, download, and install the "Nebulizing Diffuser" app by Organic Aromas.
6. Enable Bluetooth on your device, then open the app.
7. Power on the diffuser by pressing and holding the touch sensor button on the base for 3 seconds.

⚠ If the diffuser does not activate, please refer to the "Charging Method"

8. In the app interface, tap the + icon to add a new diffuser. Follow the prompts to "Search" and "Connect" your diffuser in order to complete the Bluetooth connection.

9. Once connected, tap on your device name to enter the Diffuser Control Interface. Here, you can start, stop, and schedule your diffuser's operation.

⚠ The diffuser connects to one device at a time via Bluetooth

✗ Bluetooth range is limited to approximately 10 meters (30 feet) from your device.

- When the diffuser is powered on: Use the Function/Power Button to turn the blue LED light on and off.
- When the diffuser is powered on and charging:
 - a) if the battery is NOT full, the red light will blink.
 - b) if the battery is FULL, the red light will remain on.
- Pump operation is controlled via the app ONLY.
- The battery is equipped with an overcharge protection device.

Charging Method

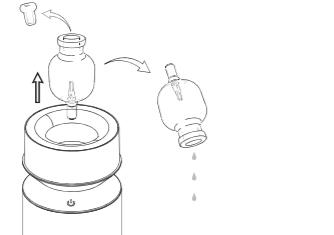

1. To charge the diffuser, connect the USB Charging Cable to the diffuser base, then insert the other end into the Power Adapter and plug it into a wall outlet.
2. You can monitor the battery level in the upper right corner of the Diffuser Interface within the Nebulizing Diffuser App.
3. When the diffuser is actively charging, a lightning bolt icon will appear next to the battery indicator in the upper right corner of the App.
4. Charging the diffuser to full capacity (100%) requires approximately 4 hours. The device can be safely used while it is charging.

Maintenance

To maintain peak efficiency, it's essential to clean your glass reservoir at least once a week. This becomes even more crucial if the diffuser has been idle for more than 7 days and you plan to reuse it again.

1. Disassemble and Empty

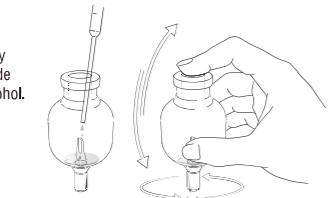

Carefully detach the glass reservoir from the diffuser's base by lifting it straight up, without twisting. Empty any remaining essential oil from the reservoir.

2. Initial Cleaning with Alcohol

Pour 6-8 ml of high-concentration isopropyl alcohol (70% or higher) into the glass reservoir. Seal the opening with one of your fingers (or another object) and shake and swirl vigorously up and down for 30 seconds to ensure all oil inside the reservoir is removed, then dispose of the alcohol.

Be aware that during shaking and swirling, some alcohol may leak from the bottom of the reservoir, which is normal.

3. Deep Cleaning of Micro-tubes

Pour another 6-8 ml of high-concentration isopropyl alcohol into the reservoir. Use the provided plastic cleaning pipette to draw some alcohol. Place the tip of the pipette directly on the straight micro-tube and forcefully squeeze the plastic cleaning pipette to ensure sufficient force is applied to expel the alcohol through the micro-tubes. Perform this action several times until all blockages in the micro-tubes are cleared, then empty the alcohol from the bottle.

4. Repeat for Thoroughness

To ensure all blockages are cleared, repeat step 2 with fresh alcohol.

5. Exterior Cleaning

Thoroughly wipe the exterior of the glass reservoir and the glass cap with a paper towel moistened with isopropyl alcohol to remove any oily residues.

6. Drying

Dispose of any remaining alcohol. Allow the glass reservoir to air dry completely, or use a dry cloth to wipe it dry, before adding essential oils and using the diffuser again. (You may also use a hairdryer to accelerate the process)

⚠ Prevent Damage
Ensure no liquid enters the base of the diffuser at any time to avoid damage.

Troubleshooting

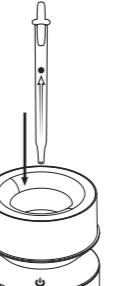

If the diffuser is not working properly or the product appears faulty, the user can perform the following maintenance:

THE MACHINE DOES NOT START

- Does the battery have power?
- Is the micro USB C charging cable plugged into the base and is it connected properly?
- Properly re-insert the micro USB C charging cable into the base

THE MACHINE IS NOT SPRAYING OR SPRAYING ABNORMALLY

- Please confirm whether the glass reservoir is properly and completely installed in the base. Is it loose?
- Is the glass reservoir clean?
- Perform a complete cleaning.
- Use your finger to gently cover the hole in the glass cap to test whether there is air pressure and if it is flowing properly. If there is no air pressure, please perform a cleaning and re-install the glass reservoir snugly into the diffuser body.

PERFORM THE PUMP TEST

1. Insert the Pump Test Device into the base of your diffuser.
2. Turn the power on.
3. Watch the ball rise to the top.
4. If the ball does not rise slowly increase the volume.
5. If the ball is not rising on the high setting please reach out to us via info@organicaromas.com

Caution

⚠ Product failure or other damage caused by failure to comply with the following precautions will void the free warranty.

1. Please do not let essential oil or any other liquid drip to enter the base, this will ruin the internal pump.
2. Turn the diffuser off before adding new oil.
3. This machine is only capable of diffusing pure essential oil, do not use fragrance oils or anything synthetic.
4. Please do not use thick essential oils such as those extracted from tree resin like benzoin, myrrh, frankincense, patchouli, vetiver, clove and sandalwood. These oils can dry inside the micro-tubes and clog/restrict air flow.
5. Do not use essential oils that contain carrier oils, such as coconut oil, jojoba oil, almond oil and grape seed oil. Also, do not use water.

6. Please add the appropriate amount of essential oil depending on the frequency of use. Do not add too much oil at one time as contact with air will cause it to oxidize, become stiff and clog the micro-tubes.

7. Blockage of the micro-tubes may cause the diffuser to malfunction. Make sure you regularly clean the diffuser glass according to the method described in the instruction manual.

8. In order to avoid damage to the machine do not expose it to direct sunlight, place it close to an air conditioning vent, or near the outlet of heating equipment such as a radiator.

9. If you do not plan to use the machine for a long time, please pour out all remaining oil in the glass reservoir and perform a thorough cleaning. After the glass reservoir is clean and completely dry return it to its original position for storage.

⚠ This machine contains lithium batteries. Treat with care, never leave unattended.

Activate Your Warranty

The Company shall not provide any warranty for instances meeting the following situations:

1. Malfunctions that occur after one year from the date of purchase.
2. Malfunctions due to damage caused by letting liquids into the machine body.
3. Deliberately altering the purchase date and other information.
4. Malfunctions caused by fire, earthquake, storm, flood, pollution, disaster, war or other external factors.
5. Malfunctions caused by disassembling, modifying or repairing on your own.
6. Normal wear of LED lights, accessories and other consumables.
7. Malfunctions caused by failure to use specific essential oil or the unit as indicated.
8. Malfunctions caused by neglect or abuse.

Upon receipt of your diffuser, please register your warranty at:

organicaromas.com/pages/warranty

- Organic Aromas will only guarantee those units that have properly registered their warranty.
- In the case the product has been properly used, but experiences normal product failure, the company shall provide a one-year (from the date of purchase) free parts and services warranty.
- In the event of product failure, please prepare the product, accessories and original order information and present it directly to Organic Aromas.
